

## **AlarmAlert**

#### **Premise Notification Accelerator**

### What in the world is a Premise Notification Accelerator?

Actually, a Premise Notification Accelerator (PNA) can be any one of seven different products, all a part of the AlarmAlert product family. Every one of them provides essentially the same function which is....

To get the right people to the right place, as quickly as possible, for response when needed.

Technically, all PNA's do the same thing. They detect a sensor reported event and report it to those who need to know within seconds, with no third party delays, or monthly charges. There are seven basic models. Let's take a look at what each one does and how it performs its function.

### **MODEL CONFIGURATIONS**

The basic *AlarmAlert* consists of a choice between a VHF or UHF one to five watt analog transmitter for voice alarm reporting, or optionally, the ability to connect to the Internet for text messaging and email notification with attached voice file, plus up to eight wired inputs from external devices, automatic detection of AC power failure and restoration, an internal back up battery for operation in the event of AC power failure. The heart of the system is an internal memory conversion circuit that can recognize wired switch activation from multiple inputs. When activated, the input terminal code is identified and converted to either a voice or text message, depending on model, and then sent by 2-way radio, or the Internet as applicable. Pricing is as follows:

Basic *AlarmAlert* with choice of VHF or UHF internal analog radio for local area notification - \$949

Same as above except with Internet connected modem for wide area digital notification - \$949

Dual mode AlarmAlert with both local voice and wide area cell phone and/or PC notification - \$1,249

Add internal long range receiver for input from external digital devices, up to 500 feet - \$300 away. Compatible with personal call buttons, wall mount call buttons, door switches, motion detectors, Smoke detectors, and AC tamper sensors (not included)

#### **Optional accessories:**

External repeater – Extends range up to 1000 feet. Multiple units can be used. Price each
\$449
Digital VHF radio in lieu of analog radio. Compatible with Hytera and Motorola DMR radios
\$200
\$449
Programming, setup, test and shipping included. On-site installation & training adds
\$800
External call buttons and sensors – See individual product sheets

## **Companion II**

Works with existing security systems

Connect *Companion II* to your existing security system and reduce the notification time to first responders from an average of 4 minutes to an average of 20 seconds or less. Choose from notification by first responder 2-way radios or via the Internet to cell phones, PC's and Smartphones. Three models are available. One of them is just right for YOU!

Product information at: http://info4u.us/CompanionII.pdf

Application story at: http://info4u.us/Piedmont-PR.pdf

Prices start at just \$549 – No monthly charges or long term contracts! For more information, or a demonstration, just give us a call at 205.854.2611 or email ServingU@The-Communicators.net

**ActionAlert**®

Premise Notification Accelerator

**For School Safety!** 

Help at the push of a button!

Let's you alert all these people in times of emergency!

## HelpQuick For Industrial plant safety

Get help when needed for accidents, medical emergencies, maintenance or material problems. At the touch of a button, plant workers can alert administrative, plant safety, and maintenance personnel when help is needed anywhere in the work area. Install one every fifty feet at a cost of only \$149 per location. No wiring or electrical power required!

A single AlarmAlert terminal can monitor hundreds of HelpQuick call buttons throughout your plant (up to 500 feet away) at a cost of just \$1,549. Additional repeaters are available to extend range up to a thousand feet in larger plants for just \$449 additional per repeater. The terminal can recognize the location of the activated button, then send an emergency voice message to plant 2-way radios as well as to cell phones, PC's and smart phones. Call us at 205.854.2611 for a demonstration! Also see our *HelpAlert* system at http://info4u.us/SA.pdf.

We've been producing Courthouse wireless emergency calling systems since 2006. Our new third generation Companion is our best ever, chosen shortly after introduction by the Butler, Choctaw, and Lamar county court systems in Alabama.

The price is right just \$2,349 for the *AlarmAlert* central processor with both radio and Internet notification alerts to cell phones, PC's, and Smartphones. The price includes programming, testing, and installation anywhere in Alabama.

Emergency call buttons, either fixed or personal are just \$99 each, and we have a dandy little radio if you need additional units for court security officers. We can operate on your patrol frequency or covert as desired.

See recent press release at http://info4u.us/Butler-PR.pdf for more information

More product information available at http://info4u.us/Companion\_Courthouse\_Security.pdf

#### CATCHES ROBBERS

#### CATCHES BURGLARS

#### **CATCHES THIEVES**

# **CrookCatcher**

#### Portable wireless surveillance system

Stakeouts are very effective in law enforcement. They are also very expensive in terms of manpower and equipment. We have an alternative. It's called the *CrookCatcher*!

*CrimeBuster* can watch for tampering with air conditioners, boats, tractors, and other high value items. *CrookCatcher* can watch doors, movement inside the premises, and for disruption of electrical power. Even a wireless personal emergency call button is included for use by those who may be at high personal risk.

The complete system can be set up in just a few minutes. Notification can be by 2-way radio (VHF or UHF) or via the Internet to cell phones, PC's or smart phones. There are no monthly fees and the price is right – just \$1,995 for your choice of the radio notification or Internet connection model (Add \$300 for notification by both radio and Internet).

Want to see CrookCatcher in action? Drop us an email to ServingU@The-Communicators.net or give us a call anytime at 800.698.6515.

### A Special Message To Volunteer Fire Departments!

If you are having problems receiving dispatch page messages since narrow banding, you need to know about......

VoiceTXTR!

*AlarmAlert* technology allows us to extend the range of your pagers in fringe areas at a fraction of the cost of adding additional repeater stations by automatically converting voice paging messages to text and sending them directly to your smart phone. Or, we can repeat the voice message from your local fire station to make sure you always get your call from dispatch. Better yet, there are no monthly fees, and no additional effort is required by dispatch operators.

The cost is reasonable – just \$1,249 for either the Internet or radio model. Or you can have both radio and smart phone capability for \$300 more. Additional information is available at http://info4u.us/VoiceTXTR.pdf.

### A Special Message To Law Enforcement Agencies!

If your officers are having problems receiving dispatch calls since narrow banding, you are not alone. That's the bad news. The good news is......

# VoiceTXTR-LE!

*AlarmAlert* technology allows us to extend the reception range of your 2-way radios in fringe areas at a fraction of the cost of adding additional repeater stations. We do this with the *VoiceTXTR-LE* to automatically convert voice dispatch messages to text and sending them directly to your officers smart phones.

Here's another great feature! The -LE provides a backup if you lose a repeater or even the 911 dispatch radio! As long as you have an Internet connection, you are in business. You can even send text dispatch messages from a portable radio!

The cost is reasonable – just \$1,549 including minor modifications that may be required at your dispatch center. Additional information is available on line at http://info4u.us/VoiceTXTR-LE.pdf.

CareNet – For help in a hurry when needed!

*CareNet* is not a product. It is a program, based on *AlarmAlert* technology that is based on the power of people helping people! *CareNet* is especially well suited for neighborhoods and rural areas where traditional fire and law enforcement response times can often be thirty minutes or more. With *CareNet Community Responders* can be on the scene within two minutes!

You can learn more about the *CareNet* system by reading a White Paper prepared especially for churches and schools at <a href="http://info4u.us/ChurchTalk.pdf">http://info4u.us/ChurchTalk.pdf</a>. The system is simple, affordable, and efficient. And, there are no installation costs or monthly fees. Check it out. You'll be glad you did!

Product information and pricing is available at http://info4u.us/CareNet.pdf.

We would welcome the opportunity to speak at county church associations, neighborhood associations, Chamber of Commerce, Civic Club and City/Town Council meetings. To arrange a visit, just call Burch Falkner personally at 800.698.6515. We'll be waiting for your call!

The products and services presented are based on our unique *AlarmAlert* technology. As you may have noted, the same technology has a variety of applications that are unique, beneficial to the user, and profitable to the seller.

As a manufacturer of communications equipment, or as a seller, these products can be incorporated as a part of your product line to enhance sales of your primary products, to expand your distribution channels, and to establish your company as unique in the marketplace. These products can be the foundation of establishing a highly focused sales organization through the addition of specialized training offered through our associate organization, Samaritan Services (http://SamaritanServices.biz).

We offer another line of products with unique capabilities. These products are known as the *BlueBox* product family. See <a href="http://info4u.us/BlueBox-Family.pdf">http://info4u.us/BlueBox-Family.pdf</a> to learn more about them.

Thanks for taking the time to review this presentation. We look forward to working with you!

Burch H. Falkner, CEO
