

AN INTRODUCTION TO THE CS PAGER-RADIO PRODUCT FAMILY

We have a Pager-Radio for every need and every budget. All of our CS Series radios are available in VHF or UHF, with built in paging, Unit ID, and a paging alert tone that sounds just like a Motorola Minitor pager. A sample of this sound is available at <http://info4u.us/PageAlert.wma>.

And, even the lowest priced model CS100/101 has the features, quality, and performance of similar products costing hundreds of dollars more. All CS models have extra loud 1000 mW audio, highest rating MIL-SPEC 810F, and are up to 30 minute water submersible per IP-65 specifications. The CS200/201 and CS710/711 display models can show the ID of the person talking on any CS series radio and the CS710 is capable of communicating in both standard analog as well as DMR (think MotoTRBO) digital modes. All models are compatible with standard 2-pin Motorola audio accessories and all are compatible with the Falcon Wireless BlueBox system (See <http://info4u.us/BlueBox-FGS.pdf>). The prices are GREAT, as you will see below:

Model CS100 Analog Non-Display Model- Price \$189

Custom programmed on your choice of up to 16 VHF or UHF channels with up to 5 watts of power in VHF or 4 watts UHF. The CS100 is lightweight (just 8.3 ounces) compact (just 3.7" H x 2.2" W x 1.27" D). Price includes MDC1200 digital ID encode, custom page alert tone, 12 hour Lithium-Ion battery, desk charger, flex antenna, belt clip and one year factory warranty. Note: Standard alerting is available for \$40 less if Minitor page alert tone is not required. Spare battery or speaker-microphone adds \$49 each.. Additional information available at <http://info4u.us/CS100.pdf>.
