

EvacALL®

Emergency Mass Notification Call System

Gets the word out for schools!

Meets 29 CFR 1910.165(b) standards

The EvacAll wireless notification system uses LoudMouth technology for quickly alerting large numbers of people in times of emergency. *EvacAll* is especially well suited for use in schools with existing wired PA Systems. EvacALL can access the school PA systems with either of two devices – a small personal 2-way radio or a desktop call button unit.

EvacAll provides three methods of alerting - a flashing strobe light, an audible musical alert tone, or a voice message. The system uses a wireless VHF or UHF receiver, coupled to an internal message recorder and playback unit through a high powered audio amplifier and directional horn speaker for maximum audio in noisy areas. The CS100E personal 2-way radio with an internal alert generator is used for activation See note at bottom of page.

No wiring is required. No FCC license is required, although the system can be used in conjunction with existing licensed VHF or UHF radios systems. The *EvacAll* units simply plug into an available AC outlet and is hard wired to the school PA system by your local sound contractor. Activation is by one or more associated portable 2-way radios or the HelpAlert shown at the lower left. The LPA201 shown at the top left is for connection to existing wired PA systems to allow control by personal 2-way radios. The optional LM301 (not shown) can be used as a standalone supplement to your existing PA system. This model is ideal for athletic fields and other areas not served by your current PA system.

A second speaker can be added to the LM301 or LM302 to provide enhanced coverage (typically on the order of 4000 square feet per speaker or about 100 feet in an oval pattern). More info at falcondirect.com/EvacAll/

Features and Benefits:

- Meets 29 CFR 1910 165(b) standards
- Works with existing PA systems or as a standalone system
- Simple to install by user, can be easily relocated as required
- No monthly charges or long-term contracts. Price includes custom programming and delivery.
- Both musical alert and voice messages available with CS100E and HelpAlert

Quick Pricing Guide

- LPA201, EvacAll PA system controller - \$649
- LM301, EvacAll with single speaker - \$749
- LM302, EvacAll with strobe light - \$849
- LM-SSO, Adds second speaker to LM301 - \$49
- CS100E Personal 2-way radio - \$189
- HelpAlert desktop call button unit - \$349
- FCC approved for Part 90 and 95 use
- LM-PGM programming kit for *EvacAll*, Portable, and Fixed station radios - \$349

Ideal for a variety of needs...

- Industrial Plants • Parks • Golf Courses • Schools

Special Note: The [CS100E](#) portable and the [HelpAlert](#) desktop station have a special pushbutton activated theme music from the movie Rocky which is broadcast over the *EvacAll*. The unique sound provides a fast and efficient means of alerting all personnel at the push of a button. See youtube.com/watch?v=V8vOvjZbfPM (Rocky) or info4u.us/FloorAlarm.way (warble tone) for alert sound samples.
