 **Double your pleasure, double your fun,
Get yourself two radios, instead of just one!**

If you are like a lot of other 2-way radio users, you have probably been thinking about moving up to digital. But there are questions, like which brand, which model, which technology, and the list goes on. If you want the answers to all these questions, check out Info4u.us/DMR.pdf or visit our web site (See above). Better yet, do it the old fashioned way - Try them out!

To make the decision easier, we would like for you to try our Executive Model PD782. This is the radio that does it all - It talks, It texts, It beeps, It wiggles, It's private, It's loud, It's clear, It allows communications with your entire workforce, and/or selected work groups. It talks a long way, for a long time, at a reasonable price and no maintenance worries. It can talk to your older analog radios to allow an easy migration to digital and it can connect to local or wide area network for extended communications to any location in the world! And BTW, you can even use it outdoors! The price is right, just \$843 with a three year warranty!

The PD782 has a little brother with most of the features, but less the fancy stuff. This is a radio for workgroups. It's called a PD502. It doesn't cost as much as a good quality analog radio - just \$362 with free programming. We think you should try BOTH radios. After all, different people do have different needs, so we are making a very special offer. If you order (and keep) a PD782, we'll throw in a PD502 FREE! Now we know that you are probably going to be purchasing more PD502's than PD782's, so we are going to make you a special offer on future orders of PD502's. For every radio you order, we'll throw in a FREE speaker-microphone or spare battery!

So what about future orders on the PD782? We'll give you a free spare battery, and a speaker-microphone (or other audio accessory), AND a \$150 trade-in allowance for your old analog radio!

So, when you're ready, give us a call at 800.489.2611. We'll take your order for a PD782 at \$843, include a PD502 at no additional charge, program them on up to 16 channels of your choice (VHF or UHF), plus a digital test channel. Charge them to the credit card of your choice. Test them for 15 days. If you like them, order some more at our special price offers above. If not, send them back, prepaid, in original condition for a full refund. Sounds fair to us. How about YOU?
