

SmartTalker Personal Communicator

Nextel, the first and best,

in long range PTT communications has announced a new generation of personal wireless communications devices. We call them *SmartTalkers*, the heart of the new *CareNet* Program, developed by Falcon Wireless. Together, we have teamed up to offer the best group communications system on Planet Earth!

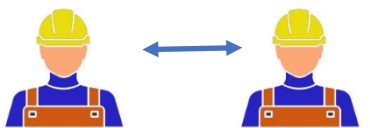

Nextel, through *CareNet* offers better interoperability, better range, and affordability than any other group communications system whether it be conventional analog or digital 2-way radio, FirstNet, P25, or SouthernLinc. There are no long-term agreements, expensive infrastructure to purchase and maintain, or promises to improve system capability in the future. Our new *SmartTalker* provides superior performance right now, and beats them all with *À la carte* pricing. You pay for what you want, when you want it.

The *SmartTalker* is compatible with the *TeamTalker* nationwide PTT communications system previously offered by Falcon Wireless as well as private radio systems including UHF, VHF (low and high bands), 700/800 MHz, analog or digital (DMR, NXDN, or P25), conventional or trunked networks; using our optional *TeamBridge* terminal. An intrinsically safe model of the *SmartTalker* is available for Chemical, Mining, and Petroleum users as well as firefighters and others who may need IS capability.

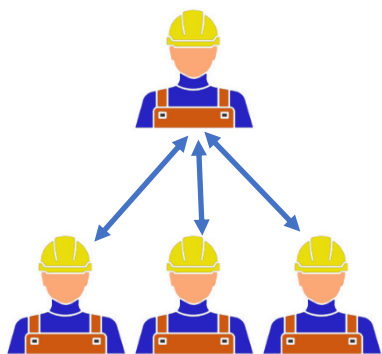

Unlike other wireless communications devices, the *SmartTalker* doesn't "die at the door" when first responders need to enter large structures. *SmartTalker* can automatically switch from a wide area outdoor network to an indoor WiFi network when needed. Coverage in dead or weak signal areas can be improved by combining the wide area network with local area networks. More information is available on request.

The bottom line is that no other product, regardless of brand or network, can provide better coverage, lower cost, or greater flexibility than *SmartTalker*! More importantly, *SmartTalker* is designed for mixed group communications to provide a new level of community safety through a concept known as *CareNet*. Additional information is available at info4u.us/CareNet-2018.pdf.

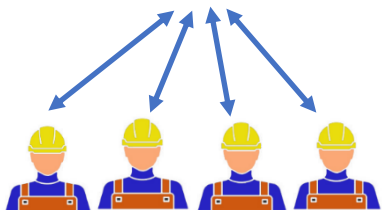

BTW, a mobile version of the *SmartTalker* is available for fixed use in vehicles of all types including church vans, school buses, trucks, and utility vehicles. It's called a *MicroMobile*. See info4u.us/MicroMobile.pdf for more info!

One-to-One

One to Many or Many to All!

Or All to All with the Nextel i500

Falcon Wireless
We see things differently!

À la carte pricing follows:

Basic SmartTalker with antenna, rechargeable high capacity Lithium-Ion battery, pocket clip, and Lifetime warranty (See info4u.us/KMC-Program.pdf for more information). Optional Next Day Exchange service also available. Net delivered price - \$449. Intrinsically Safe model is \$100 more. Accessories and available user service programs are as follows:

SmartTalker Audio Accessories. We offer a wide variety of devices to enhance hearing protection in noisy areas. Smart Plugs provide the best overall solution. Additional information is available at info4u.us/AskMallorie.

WiFi Only – For industrial plants, schools and other large buildings. Pay \$9.90 monthly or \$99.00 annually in advance. One year minimum term. Requires access to user’s WiFi network. Login and password required.

Network PTT – 99.9% Nationwide outdoor coverage with limited in-building coverage. Can be added for \$10.00 monthly or \$100 annually to WiFi plan. Available for \$14.90 monthly or \$149 annually without WiFi.

GPS Tracking and S.O.S. reporting – Adds \$10.00 monthly or \$100.00 annually to Network PTT service. Not available without Network PTT service.

Smartphone Cellular Service – Add Android cellular phone service to Network PTT with GPS/S.O.S. combo plans for \$25.00 monthly or \$250.00 annually for a total of \$49.90 monthly or \$490.00 annually. Unlimited talk, text, and data.

PC or Smartphone APP – Adds PTT capability to Windows based PCs or Smartphones (Android or IOS). \$9.90 monthly or \$99.00 annually. Not recommended for mission critical or CareNet use. Recommended for occasional use only.

TeamBridge Terminal – Adds a one-time cost of \$1,495. Requires user provided radio of type to be bridged to *SmartTalkers*. There is no monthly charge other than associated cost (if any) with user device. More information is available at info4u.us/RadioBridge.pdf.

Main Features

- IP55 dust and splash protection
- Robust, rugged, and heavy-duty design
- Low battery alert
- Crisp, clear high-quality sound
- Private Call and Group Call
- Contact List
- Voice annunciator
- Large, bright display
- Built-in GPS
- Rapid AC desk charger
- Private, Group, and All Call
- Contact list

Specifications

Frequency Range – GSM 900/1800 MHz, WCDMA 900/2100 MHz

Battery – Lithium-Ion 2800 mAh

Temperature range -68 to +140 F

Dimensions – 5.28” H x 2.24” W x 1.38” D

Weight – 9.14 ounces

Specifications are subject to change, in the interest of technical improvement without notice or obligation.
