Wireless 2-way Intercom Systems

## Keeps you connected!

*Help at the push of a button!*

The *TouchCall* 2-way wireless intercom system comes in three models. The standard QB201 model shown at the above left is a battery powered 2-way call box ideally suited for use to allow visitors at secured doors to talk to inside personnel or for direct contact with support personnel. The XT202 has a more rugged housing for use in parking lots, industrial yard areas, golf courses, etc. as well as optional advanced features such as voice prompts and external relay controls. Both the QB201 and the XT202 are powered by easily replaceable "D" cell disposable batteries that last for up to one year before replacement is necessary.

The XT203 is similar to the XT202 with the additional capability of controlling remote power operated gates (gate control unit not included). All models are available in VHF, UHF, or MURS license free use. Standard models are all analog. DMR or NXDN adds \$200 to *TouchCall* unit pricing.

- Provides public access for assistance
- Protects people and premises
- Reduces labor cost
- Simple to install by user, can easily be relocated as required
- No monthly charges or long-term contracts. Price includes custom programming and delivery.
- See [info4u.us/Q-Series.pdf](http://info4u.us/Q-Series.pdf) for info on our door access control model.

### Quick Pricing Guide

- QB201 Building access callbox (V, U, or M) - \$549
- XT202, Public access callbox (V, U, or M) - \$995
- GB203, Gate control callbox (V, U, or M) - \$1,406

### Options

Z-Call - Desktop office transceiver - \$349  
See [info4u.us/Z-Call.pdf](http://info4u.us/Z-Call.pdf) for more information

PT150V, U, or M - Transceiver (at left) - \$349  
(V and M models can also receive weather alerts)

RF Power Output:	1000 mW - 2000 mW	2000 mW - 4000 mW	2000 mW

### General Specifications

Coded Signaling:	Encode CTCSS, DCS, DTMF, 3-7 tone SelCall
Typical Range/Coverage:	Up to one mile, line-of-sight to a portable 2-way radio, or approximately 350,000 sq. ft within buildings. Greater range is possible with optional outside antenna system
Battery Life: (XT Models)	Up to 1 year with "D" Cell alkalines (6)
Antenna:	Internal, tamper-proof, ¼ wave (XT models) - External 7" flex antenna (DC Models)
Exterior Housing	Gasketed, water-resistant, polycarbonate with UV stabilizer for outdoor use (XT and DC Models)
Dimensions:	11.5" x 9.5" x 4.0" (XT Model) - 7.0" x 5.0" x 3.0" (IC Model) - 4.0" x 3.75" x 1.75" (DC Model)
Weight:	9. pounds 10 ounces (XT Model) - 3 pounds including antenna & cables (DC and IC Models)
Switch Input:	Front-panel, push to Call/Talk button
Voice Message "Reset"	Automatic after 30 seconds of inactivity or custom programmable
Voice Message "Low Battery Alert"	Standard feature (XT Models) DC and IC models operate on 110 VAC
Programming Method:	User Programmable with optional PC Programmer and USB to 5 Pin Mini USB Cable
Programmable Features:	Can be programmed for use with repeaters

### Optional Radios

The RT Series desk top transceiver is ideal for office use. With 10 channel capability, a weather channel can be included on VHF models as well as other desired VHF frequencies. Weighing less than a pound and smaller than most desk calculators, this is the ideal office companion for *TouchCall* wireless call boxes. The PT150 personal 2-way transceiver is capable of responding to messages originating from either the XT or DC model call boxes or communicating with the RT Series fixed station transceiver. Weighing only 10 ounces, the license free model has up to 8 channel capability. Standard VHF and UHF models have up to 255 channel capability with up to 5 watts of power.
