

# VoiceCaster®

Emergency Mass Notification Call System

## Gets the word out!

Meets 29 CFR 1910.165(b) standards

The *VoiceCaster* wireless mass notification system is ideal for quickly alerting large numbers of people in times of emergency. *LoudMouth* is especially well suited for use in manufacturing plants subject to compliance with OSHA safety standards for mass alerting.

*VoiceCaster* provides three methods of alerting - a flashing strobe light, an audible siren type alert tone, or a voice message. The system uses a wireless VHF or UHF receiver, coupled to an internal message recorder and playback unit through a high-powered audio amplifier and directional horn speaker for maximum audio in noisy areas. The CS100E personal 2-way radio with an internal siren alert tone generator. See note at bottom of page.

No wiring is required. *VoiceCaster* can be used in conjunction with existing licensed VHF or UHF radios systems or FCC unlicensed on MURS channels. *VoiceCaster* units simply plug in to available AC outlets. Activation is by one or more associated portable 2-way radios. The VC201 shown at the top left is for connection to existing wired PA systems to allow control by personal 2-way radios. The VC301 (top center) includes a high output speaker to provide notification in remote areas not covered by wired PA systems. The VC302 at the bottom left provides both audible and visual alerting capability.

A second speaker can be added to the VC301 or VC302 to provide enhanced coverage (typically on the order of 1000 square feet per speaker or about 50 feet in an oval pattern). Call 206.854.2611 for more information.

### Features and Benefits:

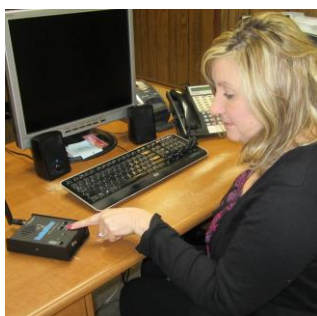

- Meets 29 CFR 1910 165(b) standards
- Works with existing PA systems or as a stand alone wireless PA system
- Simple to install by user, can easily be relocated as required
- No monthly charges or long-term contracts. Price includes custom programming and delivery.
- Both siren alert and voice messages possible with the CS100E personal radio

### Quick Pricing Guide

- VC201, For use with existing PA systems - \$649
- VC301, LoudMouth with single speaker - \$749
- VC302, LoudMouth with strobe light - \$849
- VC-SSO, Adds second speaker to LM301 - \$49
- CS101E Personal 2-way radio - \$299
- Z-Call - Fixed office radio (lower left) - \$349  
(V and M models can also receive weather alerts)
- VC-PGM programming kit for *VoiceCaster*, Portable, and Fixed station radios - \$349

*Ideal for a variety of needs...*

- **Golf Courses** • **Hospitals** • **Plants** • **Mines** • **Parks** • **Schools**

Special Note: The CS100E has a special pushbutton activated siren sound used for emergency activation of the *VoiceCaster*. The unique sound provides a fast and efficient means of alerting all personnel at the push of a button. A sample of this sound is available at <http://info4u.us/FloorAlarm.wav>.
