

Disruptive people can mess up your day! In the course of your daily activities, there is a good chance you may encounter one or more of them. They are capable of not only robbing, but hurting or killing us.

You may think that crimes of assault and robbery are only for big cities. Not so! The fact is that you are in just as much danger of robbery in a rural bank or convenience store in a rural community as in a large city. Any business with cash, drugs, or things that can easily be sold is at risk.

We think you could benefit by participation in a program to make our communities safer. Your cost could be as little as \$449 to serve your own needs or slightly less than \$6,000 if you choose to provide the infrastructure to serve your entire community.

Please take a few minutes to review the following information. It could be a lifesaver! Thank you for your time and consideration.

Burch Falkner, CEO

## Time is on his side!

In the USA, an armed robbery occurs every minute. Far less than 50% are caught. The reason? The average crime of assault or robbery is committed in four minutes or less, while the average response time by law enforcement is ten minutes or more! See <http://www.crimedoctor.com/robbery1.htm> for more interesting information on crime in the United States.

If you have cash, drugs, alcohol, or items easily redeemable for cash, you are at risk, even if you have a commercial security system.

That is why we developed the *No Time For Crime Program* (Additional information at [info4u.us/ntfc.pdf](http://info4u.us/ntfc.pdf)). We have created a simple, effective, and affordable device that can put time on YOUR side! It's called a *HelpAlert-II*.

At the push of a button you can instantly alert other persons on the premises of your need for help in a hurry. In many participating cities, the push of a second button can notify law enforcement personnel directly within 10 seconds!

This is *HelpAlert-II*. Push the black button at the top to send an alert message such as *Assistance needed in front office* directly to on-site personnel, or push the red button on the bottom to send the message to local law enforcement officers in less than 10 seconds! (Requires agreement with participating agency - details available on request) by calling 800.489.2611).

*HelpAlert-II* works with most VHF or UHF radios. If you don't have radios, we offer models for as little at \$129. Additional information available at [info4u.us/tcir.pdf](http://info4u.us/tcir.pdf).

So what does *HelpAlert-II* cost? Just \$449 and there are NO additional costs. No long term contract, and no monthly fees. That's a small price to pay for personal safety don't you think?

Want more information? Please see: [info4u.us/HelpAlert-II.pdf](http://info4u.us/HelpAlert-II.pdf). Want a demo, give us a call or drop us an email. We can help you get the help when needed, in a hurry!
